FREE TRUSS ACCESSORIES

Connessione più semplice per assemblare FREE TRUSS

Per l'assemblaggio dei tralici FREE TRUSS sono disponibili vari accessori che ne rendono possibile molte applicazioni.

Il più usato sistema di connessione è il modulo star, che può essere a 2, 3 e 4 vie. Per molte applicazioni o per installazioni permanenti può essere utile usare la connessione diretta tra forche.

Connection system: the easiest way to assemble FREE TRUSS

In order to fulfil the needs of the many and varied set up possibilities, there is a vast range of FREE TRUSS accessories available.

The most frequently used is the Star connection which is available in 2, 3 and 4 way versions. In some particular instances, particularly permanent installations, the Direct Fork connection system is preferred.
